Reiki Universal Life Energy

An ancient method of hands-on healing used to balance energy flows in the body. Everything is energy: ourselves, animals, plants, the air, our planet and the universe. This universal Life Force Energy surrounds us and flows through all living things. It is believed by many ancient cultures that when the energy pathways in our bodies become obstructed, the quality of our health is impaired. Reiki can heal on the physical, mental, emotional and spiritual levels, therefore making it a truly unique healing experience.

Reconnective Healing

Newest Healing Technique on our Planet

Reconnective Healing is a form of healing here on the planet for the very first time. It reconnects us to the fullness of the universe, to the fullness of our beings and of who we are. It is also considered to be able to reconnect us to our very essence, not just through a new set of healing frequencies, but through possibly an entirely new bandwidth. The reality of its existence has demonstrated itself clearly in practice as well as in science laboratories. Reconnective healing and evolutionary frequencies are brought in via a spectrum of light and information. Through The Reconnection we are able to interact with these new levels of light and information, and to reconnect. This is something new. This is different. This is real—and it can be entrained in each of us.

Quantum Touch

Principles of Resonance and Entrainment

Everything vibrates. When two things vibrate at different frequencies, there is a tendency for the lower to entrain to the higher. Quantum Touch practitioners learn to hold a high vibrational field of life force energy through breathing techniques. When that energy is placed around a dis-eased part of the body, it will entrain to the higher frequency, allowing the body to facilitate its own healing. We do animals & humans

Energy Healing Fees: \$50 - \$85 Animals dictate their own healing time, generally 20 to 50 minutes.

Animal Communication

Animals DO communicate with the world around them and Colleen can help you experience just what it is they have to say! With a private consultation, even by phone, you'll feel more connected to your beloved pet, learning many things about them, such as:

- Gain insights into their innermost feelings and what they think about: their food, health or problems they may be having.
- Hear your animal's thoughts about his life and companions, her most favorite thing you do for her, or what can make him happier.
- Share animal's understanding and acceptance of the cycle of birth, life, death and rebirth. Bridge the gap between here and the other side of life when your companion animal crosses over is preparing to do so.

Animal Communication is a telepathic bridge between species. It is driven by both our intent to speak with an animal and our attention on them at the same time. For this reason communication can be done over distance, allowing for telephone consultations, even when your animal friend is not present.

Colleen routinely works this way for animals and their humans all over the world, including the rescued animals at Popcorn Park Zoo in Forked River, NJ, part of the Associated Humane Societies.
